FLUSHTECH GI

- Simultaneous Port Flushing
- Pulsating Flush Technology
- Flushing Sensor with Alarm
- Manual or Auto Flush Settings
- High Capacity Flushing
- Reporting Capabilities
- No Syringing Required
- System Decontamination Cycle

Automated Endoscope Flushing
No Manual Syringing

The FlushTech GI™ is a powerful, easy-to-operate endoscope flushing aid that uses single and dual flushing modes to move chemistry and water through all of the channels of an endoscope. Pulsating flush technology works to help remove bio-burden from the endoscope before high-level disinfection in an automated endoscope reprocessor. It includes built-in programmable settings, allowing users to set flushing parameters that will meet specific conditions for achieving optimum cleaning results and high capacity processing.

Product Specifications

Specification	Description
Dimensions	7" H x 8" W x 7" D (17.8 cm x 20.3 cm x 17.8 cm)
Case Rating	IPXO
Flush Pump Flow Rate	.75 GPM (2.84 LPM)
Flush Pump Suction	Maximum suction height—6ft. (1.82m)
Power Supply/Voltage	Wall Mount Type, IN: 110-240 VAC 1A 50-60 Hz Out: 12 VDC 1.5A
Chemical Compatibility	Flush Pump—Industry standard high level disinfectant, enzymatic and other detergents in diluted form. Do not use Isopropyl Alcohol with the flush pump.
Flush Tubes / Hook Up's Compatibility	Industry standard enzymatic and other detergents in diluted form. Do not use Isopropyl alcohol with the flush pump.
Unit Weight	9.4 lbs. (4.3 Kg)
Approvals	CAN/CSA-C22.2 No. 61010-1-04 UL Std. No. 61010-1 (2nd Edition)
